

Circular Wine Cellar, London

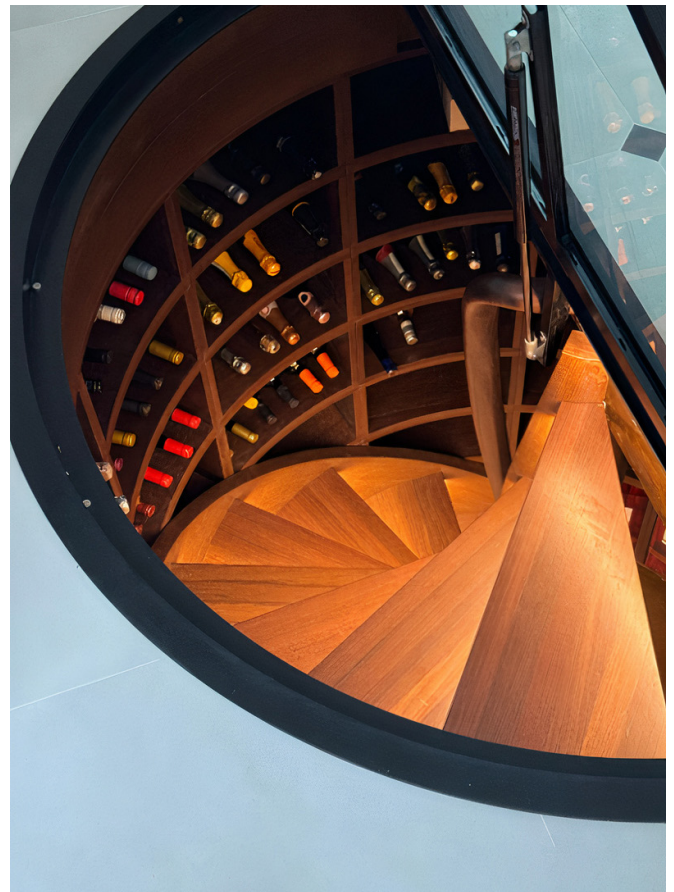

ao

At Pinnacle Joinery, we believe that true luxury is found in the details. Every project we take on showcases our dedication to craftsmanship, precision, and sophistication. This wine cellar is a prime example, demonstrating how custom joinery can elevate even the most practical spaces into stunning works of art.

The Challenge

Our client sought to transform an underutilised space into a luxurious circular wine cellar that would combine elegance, functionality, and sophistication. Their vision was to create a cellar that not only stored their wine collection but also became a showstopping feature of their home, offering an experience as refined as the wines within.

The primary challenge was to create a design that would seamlessly integrate with the existing architecture of the home while maintaining structural integrity. The circular shape required precise engineering to ensure that the walls and ceiling could support the weight of the cellar and withstand any potential shifting of the surrounding ground. We worked closely with the main contractor to ensure a seamless integration of this project.

The Solution

The rich, dark tones of the wenge created an immediate sense of luxury, while its durability ensured a long-lasting structure. Each tread was carefully designed, with LED lighting subtly placed beneath to create a soft, ambient glow that guided the way down to the cellar.

Wenge shelves were custom-built to house the client's wine collection, providing both aesthetic appeal and practicality.

The shelves were designed to maximise storage space while keeping prized bottles easily accessible. A stunning glass door framed the entrance to the cellar, adding a modern touch that invited guests into this indulgent space.

Our team ensured that every detail, from the curvature of the staircase to the placement of the shelves, was meticulously crafted to achieve a cohesive and luxurious design.

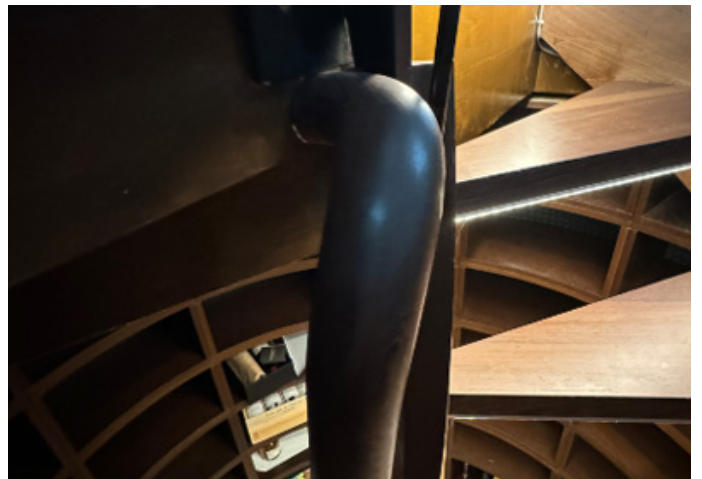

The Result

The result was a breathtaking circular wine cellar that became the focal point of the home, exuding both beauty and functionality.

The warm glow of the LED lights created an inviting atmosphere, highlighting the craftsmanship of the wenge staircase and the elegant shelving. Every step into the cellar was an experience, as the design seamlessly blended luxury and practicality.

The client was thrilled with the transformation, praising both the attention to detail and the high-quality finish. Whether entertaining guests or enjoying a private moment with a glass of wine, the wine cellar has become a true conversation piece, adding a new level of sophistication to their home.

This project is a testament to the power of bespoke joinery in turning a vision into reality. Combining exceptional craftsmanship with innovative design, we created a space that not only serves its purpose but also enhances the entire home.
